Appl. No. 10/665,995 Amdt. Dated Oct. 10, 2005 Reply to Office Action of Aug. 24, 2005

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 to 10 (cancelled).

Claim 11 (previously presented): A backlight system, comprising:

a light guide plate;

at least a light source disposed at at least one side of the light guide plate;

a diffusion plate located above said light guide plate; and

a reflection polarizer which allows S polarized light to pass while reflecting P polarized light, the reflection polarizer being located above the diffusion plate; wherein

the light guide plate, the diffusion plate and the reflection polarizer are stacked one on another in sequence, and light conversion elements are disposed on a surface of the diffusion plate and face toward the reflection polarizer to transform the reflected P polarized light thereabouts to a common light and successively redirect said common light toward the reflection polarizer without substantial involvement of the diffusion plate and the light guide plate.

Claim 12 (previously presented): A method of making a backlight system, comprising steps of:

providing a light guide plate;

positioning a light source beside said light guide plate;

positioning a diffusion plate above said light guide plate;

positioning a reflection polarizer above said diffusion plate which

Appl. No. 10/665,995

allows S polarized lights light to pass and reflects P polarized lights light;
and

forming a plurality of light conversion elements on the diffusion plate facing toward the reflection polarizer, so as to transform the reflected P polarized light to a common light thereabouts and successively redirect said common light toward said the reflection polarizer without substantial involvement of at least the said light guide plate.
